

THE SEIKOFEL-MONTE COVOLO

⌚ 4-5 h

📍 15 km

⚠️ 560 hm

Description of the way:

From the **Berghotel**, the path goes uphill and, turning right, reaches the **Froneben** mountain inn (1540 m). Take path no. 139 across the „Obere Ortl“ moor until to the forest road no. 13. Shortly after passing a high crossroads (1756 m - **Saumahd** crossroads), turn right and follow a wide forest road into the woods. At a clearing, path no. 132 turns left and leads up to the **Monte Covolo** (1908 m), passing high moors. From Monte Covolo, go down to path no. 131, which leads from the mountain pasture Alpe Nemes to Passo Monte Croce. Follow this path until you come to a hollow and then up to a hill. Here, several trails meet. Take the wide forest road no. 130, which leads to **Lago Nero lake** on the right. Shortly after the lake, the path turns left and descends steeply. Passing the **campsite**, it continues downhill and joins the Sesto Circular path no. 1, from where you return to the Berghotel.

Advices and suggestions:

a very nice and not to long hike trough absolutely quiet woods and marshy fields. Please keep on the path because this area is home to rare species like the capercaillie cock. Bring a good map because orientation is a little bit tricky and food and drinking. The first hut/restaurant is the Camping.

Summary:

a very nice panoramic tour who takes us in a little natural paradise - far away from noise and people.
