Description of the way: From the Berghotel we take the car to the chairlift on the right of Lake Misurina, where we park the car and take the cable car up to the Col de Varda hut. For the whole hike, stay on the path no. 117, and from the refuge walk to the sandy gully of Forcella Misurin (2380 m), where wooden steps and steel cables lead you up. About halfway up, you will come to the Fonda Savio refuge, where you can stop and descend to the valley. Despite the moderate technical difficulties, this is a serious crossing. After the refuge, the Bonacossa path descends steeply and is a little more demanding in the second part.

The return to the car park is along path no. 101, descending to the Tre Cime di Lavaredo road, passing Lago Antorno and the campsite to Misurina. A footpath along the eastern shore finally takes you back to the car park. There is also the possibility of taking the public bus to Misurina.

Physical requirements: an easy ferrata where you need a bit of equilibration and not to be high shy – presence of ladders

Panorama: wonderful views at the Misurina Lake and when you proceed to the [Auronzo hut](#) you have the Tre Cime very close in front of you

Indications: from the [Fondo Savio hut](#) you can finish the entire Bonacossa (trail nr.117) until the [Auronzo hut](#) at the Tre Cime. It becomes a wonderful day filling tour – back to the starting point by bus or hitchhiking!!!
